THE POWER OF IDENTIFICATION

xplor

XPLOR WORKWEAR

Xplor develops and manufactures workwear and uniforms that meet high standards of comfort, functionality and durability

DURABLE DESIGN

Workwear and uniforms must be durable and look great day after day. Specialist knowledge of materials and design has made our products stand out in the market for professional workwear - and durable products with a long service life have been our hallmark through all the years.

RESPONSIBLE PRODUCTION

It is our goal to promote more environmentally friendly, circular and resource efficient products.

Xplor is bluesign® system partner. The partnership is an important part of our work to ensure accountability and transparency throughout the value chain.

CERTIFIED

All our products meet the minimum requirements of OEKO-TEX® in material selection, and the majority of the finished products are certified OEKO-TEX® STANDARD 100.

GREAT FIT IN ALL SIZES

An extensive stock range with women's styles in size XXS-6XL and men's/unisex styles in size XXS-8XL ensures that all employees can look great regardless of size.

INDUSTRIAL LAUNDRY APPROVED

The majority of the products are approved by the laundry industry for rental and laundry schemes.

SECTOR SPECIFIC DESIGN

Our design focuses on sector-specific needs. We achieve this by being responsive to the market, maintaining close dialogue with our supply chain, business partners and end-users. Every garment is carefully designed based on employees' requirements and patterns of movement.

STOCK RANGE WITH REPLENISHMENT GUARANTEE

Our stock range enables next-day delivery and we grant a 5-year replenishment guarantee, so that companies can maintain the same work uniform for many years to come.

BESPOKE MANUFACTURING

In close collaboration with our customers, we design and develop both stand-alone products and complete clothing concepts. Production starts at 400 items.

LOGO PRINTING

We offer flexible logo printing and express delivery with a 5-day turnaround time.

MONO

Durable outerwear in recycled materials designed for the circular economy

The MONO range consists of outerwear produced in durable and recycled polyester, which provides optimal weather protection and comfort.

CIRCULAR DESIGN

The range is designed to be part of the circular economy, where the product at the end of its life can be further processed for recycling. The products are made of 100% recycled polyester in both membrane and outer fabric, so they can be recycled.

To increase the products' recyclability, we have limited the number of material types. Metal parts have been removed from i.a. press studs and string stoppers. Drawstring holes that normally contain metal have been replaced with a sewn drawstring hole.

Reflectors, which are necessary to meet traffic safety requirements, are placed so that they can be easily removed when the product is worn out.

CERTIFIED MATERIALS

The recycled polyester in both outer material and membrane is GRS-certified. Global Recycled Standard is an international full product standard for products made of recycled materials. The standard sets requirements for documented tracking of the recycled content throughout the chain, and includes requirements for social, environmental and chemical practices in the production.

XPLOR LAYERING SYSTEM

A Modular Outerwear Solution For Your Business Clients

The Xplor Layering System offers a comprehensive range of shell jackets, raincoats and inner jackets, designed to seamlessly integrate and offer countless combination options. This modular approach means that your business clients can customize their attire according to the specific demands of their work environment, weather conditions, and personal comfort preferences.

1. Shell Jackets

2. Inner

FLEXIBLE SOLUTION

With the Xplor Layering System, a flexible mix-and-match solution is achieved that can be adapted to the different work tasks and climatic conditions employees face. This flexibility makes it possible to maintain a consistent profile while also accommodating employees' individual needs for comfort and functionality.

MODULAR CUSTOMISATION

The system provides the freedom to combine a three-in-one jacket with an insulating and functional inner jacket that is tailored to the employee's needs. The series of inner jackets in fleece, pile, and quilt deliver the necessary insulation as well as moisture-regulating properties. With this layering system, employees can easily adapt their clothing to both the weather and the day's tasks.

Jackets

3. Shell and Inner Jackets

MONO

IMPROVED DURABILITY

The MONO range is also characterized by a high tear and abrasion resistance. The products are Martindale-tested with up to 20,000 cycles.

The focus of the design has been to extend the life of the products while optimizing comfort and functionality.

LESS RESOURCE USE

Material use has been reduced by 15-26% compared to similar garments. This means that the products require fewer resources to produce and emit less CO2.

Due to the lower weight, the laundry cost is reduced accordingly.

OPTIMAL WEATHER PROTECTION

With the MONO range, employees are protected against wind and weather all year round. The products are wind and waterproof, breathable with fully taped seams, water-repellent finish and membrane in recycled polyester.

INCREASED TRAFFIC SAFETY

Reflectors are placed optimally in relation to the traffic rules for cyclists and pedestrians.

XPLOR LAYERING SYSTEM

The shell jackets in the MONO, CARE, STORM and TIDE collection have extra zips that fit Xplor's inner jackets

Functionality and Design

The MONO shell jackets have been developed with a focus on recyclability, traffic safety and optimal weather protection.

DETACHABLE HOOD

Hood with reflector and space for a helmet. The hood can be tucked into the collar and integrated into the front edge of the collar.

NO METAL PARTS

Adjustable collar and bottom with string stoppers without metal parts.

TWO-WAY ZIP WITH REFLECTOR

Chin protect on top of two-way zip.

BLACKBOARD YOKE

Space for logo and with inside strap for ID badge under yoke.

VENTILATION

Zip with mesh under armpit.

CYCLE FRIENDLY

Shaped raglan sleeves, adjustable waistband, sleeve and bottom.

ZIP POCKETS UNDER WELT

Easy-grip zip pullers and chest pocket in waterproof material.

TRAFFIC SAFE REFLECTORS

On hood, cuffs, front zip, right front piece and left back piece at seam.

WATER BREAKER

Extra protection at hem to prevent water penetration.

LOGO PLACEMENT

Logo can be placed on the back, at the cuff and on the yoke.

Functionality and Design

The MONO shell trousers have a slimmer and improved fit. Reflectors are strategically placed for enhanced traffic safety.

NO METAL PARTS

Elasticated and adjustable waistband with tie cord and string stopper without metal.

ZIP POCKETS UNDER WELT

Easy-grip zip pullers.

IMPROVED FIT

Slim fit style with slimmer thighs and leg width, and shaped knees.

REFLECTIVE PANEL

Reflectors at side seam over zip.

TWO-WAY ZIP

Two-way zip for quick dressing and undressing.

TRAFFIC SAFE REFLECTORS

Reflector on right front piece and left back piece at seam.

ADJUSTABLE LENGTH

The trousers can be shortened 5 cm without changing the length of the zip.

CARE

Durable outerwear designed for cycling personnel

The CARE range consists of comfortable outerwear for men and women that provides optimal weather protection and full freedom of movement.

CYCLE FRIENDLY AND TRAFFIC SAFE

The CARE range has been designed for cycling staff and the jackets and pants are equipped with reflectors for enhanced visibility in traffic. There is space for a bike helmet under the hood and the sleeve length is adjusted for when sitting on a bike. There are adjustment options at the cuffs of the sleeves for better comfort. The pants can be adjusted at the waist and legs and have a full-length zip for faster dressing and undressing.

LARGE SELECTION OF COLOURS

The products are available in many different colours and the shell jackets therefore offer many 3-in-1 combinations when combined with an inner jacket.

GREAT WEATHER PROTECTION

The CARE range protects employees against the elements all year round. The products are wind and waterproof, breathable with fully taped seams, water-repellent finish and PU membrane.

 BIONIC
FINISH[®]ECO

Xplor uses BIONIC-FINISH[®]ECO.
The impregnation is water-repellent,
dirt-repellent, and free from fluorides.

Functionality and Design

The CARE shell jackets are developed for among others cycling staff in the public sector and their day-to-day work activities.

DETACHABLE HOOD

Large and detachable hood with room for a bicycle helmet.

ZIP-IN COMPATIBLE

Extra zips to attach an inner jacket.

CYCLE FRIENDLY

The length and width of the jacket makes it particularly suitable for cycling staff.

TWO-WAY ZIP

Two-way zip at front under storm flap, with water barrier.

REFLECTORS

Reflectors on front, back and sleeves for enhanced traffic safety.

ZIP POCKETS

Zip pockets with key strap and inside pocket with zip.

ADJUSTABLE

Adjustable waist and hem.

LOGO PLACEMENT

Inside zip for flexible placement of logo.

CUFFS

Adjustable sleeves with elasticated inner cuffs.

TIDE

Enhanced Weather Protection and Flexibility

Launching in December 2024, the TIDE Rainwear Collection in recycled materials introduces a practical and versatile weather protection solution. This line features functional rain jackets and pants, each piece crafted to endure a variety of weather challenges.

With compatibility for seamless integration with the Xplor Layering System and a large range of compatible inner jackets, the TIDE collection allows for easy customisation to suit various professional settings and needs.

DURABLE AND FUNCTIONAL RAINWEAR

The essence of the TIDE collection lies in its response to the unpredictability of weather. Designed for those who face the elements, this rainwear boasts superior protection features. With its windproof and waterproof capabilities, fully welded seams, and adjustable fittings for a personalised fit, TIDE ensures both adaptability and defence against changing weather. The integration of reflective details throughout enhances visibility and safety, ensuring protection in any setting.

INTEGRATION WITH XPLOR LAYERING SYSTEM

The TIDE collection has been designed to seamlessly integrate with the Xplor Layering System, marking a significant expansion in our product lineup. The same inner jackets that our clients have come to rely on for warmth and comfort can now be zipped into both the shell jackets and the new rain jackets. This innovative feature ensures that workers have the flexibility to adapt their gear to changing weather conditions without compromising on comfort or protection.

TIDE Raincoat, Unisex

This raincoat offers superior protection and visibility under all weather conditions, ideal for a diverse workforce. It features reflectors to enhance safety, along with extended cuffs and back for optimal coverage and weather protection. Additional zippers are incorporated for the attachment of an inner jacket, allowing for customizable layering options to accommodate varying climates.

INNER JACKETS

Compatible inner and outer jackets provide plenty of opportunity to put together a 3-in-1 jacket according to the customer's wishes and needs

Xplor's inner jackets are developed with a focus on delivering optimal warmth, visibility, and comfort under all conditions. The jackets are equipped with practical features such as full-length zippers, lined sleeves, zippered pockets, and reflective details, ensuring both high functionality and increased visibility. The inner jackets can be worn alone on cool, dry days or zipped together with one of our shell jackets for extra weather protection. This flexible design makes it possible to assemble a functional 3-in-1 solution.

URBAN

Same Style All Year Round

The collection is designed to ensure a professional and uniform appearance for employees all year round. It includes both summer and winter jackets, as well as the warm and functional URBAN parka with Thinsulate™ insulation.

All jackets in the collection are windproof, waterproof, breathable, water-repellent, and equipped with fully taped seams. Functional details such as a detachable hood, tone-on-tone reflectors, and multiple practical zip pockets enhance both comfort and functionality.

VERSATILE OUTERWEAR

The jackets can serve many purposes and cater to different industries and job functions.

The jackets are particularly used in the transport industry, the service sectors, and other industries with customer contact, where workwear is a visible and central part of the job.

URBAN Parka

The parka is equipped with Thinsulate™ Type G padding, including in the hood, as well as fleece lining on the upper body. This combination ensures lightweight and breathable insulation that retains heat, even under extreme weather conditions.

CLOUD

Stylish, waterproof coats designed for personnel wearing uniforms

The CLOUD Tech Coat collection consists of waterproof and windproof coats for men and women with a length that covers a uniform dress or suit.

The coat combines a waterproof shell jacket with a removable inner jacket. The shell jacket is made in a breathable and light 3-layer material with anti-crease effect, ensuring that it maintains a clean and presentable appearance. The inner jacket can be replaced with a warmer thermal jacket with thinsulate padding.

REDESIGNED WITH RECYCLED MATERIALS

Recently, the CLOUD Tech Coat collection has undergone a redesign, and is now produced in recycled, GRS-certified polyester.

CLOUD Tech Coat Women

Deluxe coat in 3-layer material with non-crease effect. The coats are windproof and waterproof, breathable, water-repellent, and with fully taped seams.

EXTRAS

Both styles have an inner and detachable thermal jacket. It can be replaced with a heavier thermal jacket with Thinsulate® padding (style 5800). Ideal for employees working in very cold weather.

CLOUD Tech Coat Women

Style 99066 | XXS-6XL | Regular fit

navy 5000
black 9000

Outer material (shell): 100% recycled polyester | **Finish:** BIONIC-FINISH®ECO
Lining: 100% polyester | **Inner jacket:** 100% nylon | **Padding:** 100% polyester
Seam: Fully taped | **Wind protection:** 4 / 5 | **Water column pressure:** 10,000 mm
Breathability: 3.000 g/m²/24H | **Replenishment guarantee**

Functionality and Design

The CLOUD Tech Coats have many technical details that make them particularly suitable for personnel wearing uniform.

DETACHABLE HOOD

Detachable hood with room for an up-do. The hood can be integrated into the front of the collar.

MAGNETIC FASTENING

Zip under storm flap with magnetic press-studs.

ADJUSTABLE

Adjustable waist and cuff.

EASY-GRIP

Easy-grip zip pullers so pockets can be accessed when using gloves.

DETACHABLE INNER JACKET

Thermal jacket in ultra light nylon with zip pockets. Can be worn separately.

3-LAYER MATERIAL

Shell jacket in 3-layer material with non-crease effect.

STONE-ON-TONE

Stone-on-tone reflectors on sleeves and centre-back. PU trim at the front and pockets.

LARGE PLEAT

Large centre-back pleat.

Note that magnetic press-studs may in some cases affect a pacemaker
